

What are Plants?

2023 Preschool Itinerary

Understanding different Types of Plants through Sensorial Learning

Hydroponic Transplanting

Learn about what plants needs for growing and what are their main parts through a simple Board Games. Not only so, the children will also get to experience transplanting of seedlings through our mini system.

Sensorial Learning

Using their 5 senses to explore the greenhouse and learn about different types of plants, smelling of herbs, listening to the trickling of water through the systems and feeling of the soil replacement and more.

Aloe Vera Demonstration

Understand and learn how Succulent like Aloe Vera are grown and why do store the water and turn it into slime. Children will also get the chance to have a feel of the slime which is beneficial to their skin.

Potting of Microgreens

(Takeaway)

Microgreens are young plants grown in 14 days which the children will be potting at the farm and bring home to continue the growth. On day 14 the Children could harvest and consume as salad.

Welcome Daddy & Mummy

We welcome parents to join the Children for the tour. At the end of the tour all parents will be given a packet of freshly harvested vegetables which they can bring home to whip up a delicious dinner.

Thank you Teacher/Staff

We understand all the hard work in liaising and coordinating the excursion. As an appreciation we would like to offer each teachers* with a Bottle of Kok Fah's Aloe Vera Drink.

*Every 5 paying participants will entitle 1 Teacher/Staff FOC entry.
